Off – Not powered on.

Slow Flash – Searching for connection.

device setup

Drivers and Skyus Watcher Software Available at:
ignite.novatelwireless.com

SETTING UP THE SKYUS DS

The Skyus DS comes with the SIM installed and activated. To set up the device :

1. Connect the cellular antennas to the Primary and Diversity connectors.
2. Download the Skyus Drivers from the Ignite page and install them on the host device, see "Skyus Drivers."
3. Connect the USB cable to the modem and host device.
4. Download and install Skyus Watcher on the host system for monitoring and customizing the Skyus DS, see "Customize Settings."

For complete information about the Skyus DS, accessories, installation, and SIM slot access, see the Skyus DS Installation Guide at **ignite.novatelwireless.com**.

Skyus drivers

INSTALLING THE SKYUS DRIVERS

The Skyus DS operates with Sierra Wireless drivers for Windows 7 and Windows 8 based platforms.

To install the drivers:

1. Download the drivers from **ignite.novatelwireless.com** to the host system.
2. Extract the executable file from the downloaded zip file.
3. Start the driver setup utility by double clicking the executable file.
4. Follow the installation instructions.
5. When the installation is complete, click Finish.

customize settings

USING SKYUS WATCHER INTERFACE TO CUSTOMIZE SETTINGS

You can access and customize Skyus DS settings using Skyus Watcher.

To install Skyus Watcher:

1. Download the software from **ignite.novatelwireless.com** to the host system.
2. Extract the installation file (.msi) from the downloaded zip file.
3. Install the software by double clicking the installation file.
4. When the installation is complete, click Next and Close. The system will prompt you to perform a restart to finalize the installation.

For complete information about Skyus Watcher and customizing the Skyus DS, see the Skyus Watcher User Guide at **ignite.novatelwireless.com**.
